

# SAFETY RECALL

This recall is being conducted in cooperation with the US Consumer Product Safety Commission

## Klein Tools Clamp Meters CL110, CL210, CL310 and CL110KIT

Klein Tools is issuing a voluntary product recall on four products in our Test and Measurement Line due to a potential safety hazard.

### Why Is There A Recall

The CL110, CL210 and CL310 and CL110KIT are being recalled due to a fastener that can work itself loose over time, potentially leading to a false reading when measuring voltage. This issue could indicate a reading of zero voltage on energized systems resulting in the operator falsely believing the electrical power is off, which can pose a risk of electric shock. This recall involves the CL110, CL210 and CL310 and CL110KIT Digital Clamp Meters with date codes:

Accessories in the CL110KIT, specifically the 10x Line Splitter, RT210 GFCI Receptacle Tester, test leads, batteries and carrying case are not being recalled, should not be sent back for replacement and should be retained by customer.

Date Codes
0815U-A1
1015U-A1
1115U-A1
1215U-A1
0116U-A1
