Dear Retailer:

Re: Voluntary Recall – Monster Green

Please be advised that, out of an abundance of caution, Monster Energy Company (“**Monster**”) is voluntarily recalling certain lots of Monster Green from Canadian store shelves due to a limited quality issue affecting certain lots of the product. Monster is coordinating with the CFIA on this voluntary Class III recall to the retail level.

As a result of this limited quality issue, certain Monster Green cans do not meet Monster’s high quality standards and may experience unacceptable flavor profiles and/or interior liner delamination. The cans that are affected by this limited quality issue are as follows:

Brand Name	Common Name	Size	Lot Code(s) on Product
Monster Energy	Monster Green	473ml	SE2225RD, SE1525RD and OC1325RD

In order to facilitate a speedy and effective recall of products impacted by this limited quality issue, we ask that you **remove and segregate all Monster Green products within your control with the above Lot Codes.**

Representatives from Coca-Cola Canada Bottling Limited will be contacting you and visiting your stores to remove the product. The number of cans removed from your store(s) will be recorded for credit or replacement stock at time of next order.

Should you have any questions, contact the Monster Consumer Relations Department at 1-855-488-1212. Please reach out to your Coca-Cola Canada Bottling Limited representative if you have any questions about product retrieval.

Thank you for your assistance, your continued partnership and your support of our brands.

Regards,

Monster Energy Company
